

Code: AVM-2-01

MODULATOR TV **AVM-2-01**

The AVM-2-01 is a stereo Audio/Video modulator with AV input and RF output to connecting the TV set or distributing the signal in small house installation. The device is equipped with loop-through the signal from antenna, and also there is possible to separate adjustment of audio and video levels. It works in standards: B/G and A2 stereo.

Inputs:	1 pcs Video composite (Cinch) 1 pcs IEC female 1 pcs audio (Cinch)
Output:	1 pcs RF (F)
RF output channels range:	5-12, S11-S41, 21-69
Video input level / impedance:	75 Ω
Audio input level adjustment:	✓
Audio input level / impedance / deviation:	1 Vss / 10 k Ω
Level (typical) / RF output impedance:	70 dB μ V / 75 Ω
RF output frequency (channels) range:	175 ... 862 MHz
Power supply:	12 V DC / 0.2 A (power adapter included)
Weight:	0.5 kg
Dimensions:	225 x 91 x 38 mm
Guarantee:	2 years
