NATURAL GAS (METHANE) DETECTOR **DG-1-ME** SATEL

Net: **204.00 PLN** Gross: **204.00 PLN**

The DG-1-ME microprocessor-based digital gas detectors are characterized by reliability and low current consumption. A digital temperature compensation feature allows to operate within a wide temperature range.

Gas concentration above the threshold level triggers visual and audible alarm signals. The detectors are intended to be used as part of a security system. The device should be mounted in high position, just under the ceiling.
