Main features											Intelligent Image Analysis - crossing the line (tripwire), abandoned/missing object	• The PoC (Power over Coaxial) technology used in the device allows to power the compatible with this technology cameras via a coaxial cable directly from the recorder, eliminating the need for additional wires or power supplies • Intelligent Image Analysis - crossing the line (tripwire), intrusion, abandoned/missing object, face detection	• Cooperation with Dahua devices working in the concept of the Internet of Things (IoT) • POS - support the functions included in the points of sales and displaying the date from them as overlaid text on selected channel window. • Core AudioXiaoMu support. • Intelligent Image Analysis - crossing the line (tripwire), intrusion, abandoned/missing object, face detection • Intelligent Image Analysis - crossing the line (tripwire), intrusion, abandoned/missing object, classification of people and vehicles • Automatic face and vehicle recognition and search functions • Support for up to 10 face databases, including 10 000 face images • Detection of faces not included in the device database • Searching for faces in the archive based on the 1 selected photos with the ability to independently set the similarity threshold for each photo.	• Cooperation with Dahua devices working in the concept of the Internet of Things (IoT). • POS - support the functions included in the points of sales and displaying the date from them as overlaid text on selected channel window. • Core AudioXiaoMu support. • Intelligent Image Analysis - crossing the line (tripwire), intrusion, abandoned/missing object, face detection • Cooperation with Dahua devices working in the concept of the Internet of Things (IoT). • POS - support the functions included in the points of sales and displaying the date from them as overlaid text on selected channel window. • Core AudioXiaoMu support. • Intelligent Image Analysis - crossing the line (tripwire), intrusion, abandoned/missing object, face detection • Cooperation with Dahua devices working in the concept of the Internet of Things (IoT). • POS - support the functions included in the points of sales and displaying the date from them as overlaid text on selected channel window. • Core AudioXiaoMu support. • Intelligent Image Analysis - crossing the line (tripwire), intrusion, abandoned/missing object, face detection • Searching for faces in the archive based on the 1 selected photos with the ability to independently set the similarity threshold for each photo.
