## UNIVERSAL METER UT-181A UNI-T

Net: **417.99 EUR** Gross: **417.99 EUR**

The UT-181A is a universal digital meter used to measure: voltage, current, resistance, capacity, frequency, temperature and checking the correct operation of diodes. The meter has the function of automatic change of measuring ranges, as well as the relative measurement mode.

The device enables the graphical presentation of the trend of changes in the measured value.
