VIDEO BALUN TR-4P

Net: 15.86 USD Gross: 19.51 USD

The TR-4P is designed to video signal transmission via twisted-pair cable. The device adapts the impedance of coaxial cable 75Ω to the impedance of symmetrical line, ensuring transmission of video signal up to 400m (twisted-pair cable category 5) and eliminates asymmetric interferences.

It is important to pay attention to linking the adequate terminals: (+) and (-). Reverse connection would cause distortion of image.

Designed to AHD, CVI, TVI, PAL cameras.

OUR OPINIONS

- A very important issue is that the mass signals are isolated from each other!.
- **Lifetime warranty.**
