## MULTISWITCH **MV-508** 5 INPUTS / 8 OUTPUTS TERRA

Radial multiswitches from MV series are dedicated for medium and large SMATV systems with distribution of SAT IF and terrestrial TV signals, however they can also be used in smaller installations.

The MV-508 multiswitch has an active (amplified) line for terrestrial and satellite TV. The adjustment of the gain (signal level) for each SAT IF and DVB-T lines is made with dedicated switches.

Die-cast housing guarantees high screening efficiency - class A.
