

Code: SR-827

ALARM KIT **SR-827** PRONAL

The SR-827 is a professional 2-zone alarm control panel integrated with a GPRS/GSM transmitter, using the cell phone network for reporting and notification. It is designed to send the information both to monitoring stations and directly to mobile phones. The default way of sending notifications is GPRS, but if internet data transmission is unavailable, the module sends CLIP / SMS notifications.
