

Code: INV11-GC

CONVERTER MODULE **INV11-GC** Green Cell

Inverter module increasing the voltage. The INV11-GC device converts the input voltage to the 230V AC value.

Due to the ideal sine wave approximation (the same as in the power grid), the INV11-GC is ideal for powering inductive and capacitive devices, such as: power tools, low-power household appliances, heaters, central heating pumps, etc.
