

Code: SM-1

MECHANICAL SPLICE **SM-1**

Mechanical splice mechanism for Fujikura Universal Mechanical Splice mechanical splicer from SSM-1 kit.
Mechanical splice ensures reliable connection of the two fibers obtained thanks to three points fiber positioning.
Splice is suitable for single- and multi-mode fibers with buffer coating diameters of 250µm and 900µm, the fibers are positioned based on coating geometry.

Fiber positioning:	based on coating geometry
Support:	Fujikura Universal Mechanical Splice mechanical splicer from SSM-1 kit
Coating type:	250 µm, 900 µm
Main features:	Splice is suitable for single- and multi-mode fibers
Guarantee:	2 years
