

Code: ANT-GSM-E

ANTENNA **ANT-GSM-E** SATEL

The ANT-GSM-E two-band antenna designed for cooperation with alarm control panels and communication modules equipped with GSM telephone and SMA type connector. Due to its construction, the antenna can be mounted both inside and outside the control panel housing. The device has been adapted for convenient and trouble-free mounting on the housings of the SATEL control panels.

After using the appropriate adapter, it is possible to connect the antenna also to devices with the connector type U.FL (IPX) or SMA-RP.
