

Code: TE-1060-HD/COM

HD DVB-T/DVB-T2 DIGITAL RECEIVER **TE-1060-HD/COM**

Receiver can operate in both MPEG-4 and older MPEG-2 video compression algorithms most popular in European countries. The device plays pictures, music and videos - both in SD resolution and in high definition HD. It also works as a DVB-T recorder. The USB port allows to record video data (PVR) to external data media, such as hard disks or flash memory (pendrives). It also has a LED display indicating the current channel number and the operating modes of the receiver.

The biggest advantage of the receiver is its compact dimensions.

You can use the HDMI connection to deliver HD quality signals to your TV. The TV receiver can also be connected using a EURO (SCART) cable. The SPDIF COAXIAL digital audio output allows you to connect the tuner to your home cinema system and listen to the Dolby Digital Plus E-AC-3 multi-channel sound.
