WIRELESS SMOKE AND HEAT DETECTOR **ASD-200** ABAX/ABAX2 SATEL

Wireless smoke and heat detector, which is designed to early detection of a developing fire. Besides sending the information to the control panel, the ASD-200 detector can warn of the danger of using the built sound alarm. The device is equipped with a photoelectric sensor of visible smoke. The detector also has a thermal sensor that reacts to exceeding the threshold or a sudden increase in temperature. In addition, the self-diagnosis system controls the condition of the optical chamber and signals the need for maintenance.

The ASD-200 supports the other devices copmpatible with wireless ABAX/ABAX2 system.
