POWER SUPPLY ADAPTER **CA139-VDE**

The CA139-VDE power supply allows to supply 4 device sections. The maximum load for each section is 12V_{DC} / 700mA.

Attention! If the power adaptor is using for continuous work (24H) the rated current of the adaptor should be less than 80% of the maximal current.

Please pay attention for proper cooling conditions of the power adaptor during work!

The Power Supply Unit complies with the ecodesign requirements (ErP 2009/125/EC Directive and its implementing Regulation No. 278/2009 regarding external power supplies). The device meets, among others, the requirements of the average active efficiency and power consumption at no-load condition.
