

Code: SVS-2-01

SAT AMPLIFIER **SVS-2-01** 20 dB AXING

The SVS-2-01 linear amplifier allows to compensate for the loss of signal strength caused by too long distance between the signal source and the receiver. The product also allows to improve the strength of the signal reaching the receivers through the distributors.

The device transmits the power supply and the 22 kHz signal.

Frequency range:	950 MHz ... 2400 MHz
Gain :	20 dB
Correction in satellite frequencies range:	—
Output level:	106 dBμV
Connectors type:	"F"
DC voltage passing:	✓
Power supply:	14 ... 18 V DC (from the SAT receiver or the multiswitch)
Current consumption:	≤ 80 mA (without LNB powering)
Manufacturer / Brand:	AXING
Guarantee:	2 years
