DATA SHEET

SIDE MOUNTING PANEL FOR RACK CABINETS **ZMB-1-800**

The ZMB-1-800 panel is used for vertical mounting of devices on the side wall of a RACK cabinet. It is mounted on the front and rear RACK rails (left or right). Thanks to this, an unprecedented factor of filling the cabinet with this type of equipment has been achieved, while maintaining good access to devices, adequate ventilation, transparency of connections, installation of all cables on patch panels, both with the signal coming from the antennas and going to subscribers.

The panel has 4 holes Ø6mm with a spacing of 180 x 120mm.

Width:	548 ... 570 mm
Height:	200 mm
Material:	Aluminum - powder painted
Color:	Black
Weight:	0.59 kg
Guarantee:	2 years
