## WIRELESS VIDEO DOORBELL **ATLO-DBCT-TUYA** Wi-Fi, Tuya Smart

The ATLO-DBCT-TUYA Wi-Fi doorbell except of bell function enables preview from built-in camera and bi-directional voice communication from mobile device level with the Tuya application installed.

A smart video doorbell allows to notify the property's residents about a guest's visit, even when they are away from home. Using the Tuya platform, the device sends the image from the camera to the application on the smartphone, enabling two-way voice communication with the person standing at the door. The ring signal is also sent wirelessly to the receiver in the house, which, with the help of melody sounds, notifies residents when a guest is visiting. The doorbell also has a motion detection function with the ability to local save short videos on the Micro SD card.

Tuya is an international home automation platform that connects thousands of products made by different manufacturers. The system can support all the most popular communication protocols such as Wi-Fi, Zigbee, Bluetooth.
