WIRELESS OUTDOOR SIREN **SR-230** PARADOX

The SR-230 optical-acoustic outdoor siren performs the signaling function in two ways: red optical signaling (by means of blinking LEDs) and acoustical signaling (by means of modulated high-volume sound signal). It is designed to sound an external alarm and to indicate any tampering of guarded area.

High-impact polycarbonate enclosure, featuring a very high mechanical strength and guarantees aesthetic appearance of siren even after many years of using. Construction enables high level of tamper protection (against opening and removing from mounting surface).
