WIRELESS GAS DETECTOR **ATLO-MD1-TUYA** Wi-Fi, Tuya Smart

The ATLO-MD1-TUYA gas detector uses high stability semiconductor gas sensor, which has the characteristics of high stability and small sensitivity drift. Gas concentration above the threshold level triggers visual and audible alarm signals. Before installation, please confirm the detecting gas density heavier or lighter than air. Device is designed to work indoors.

The device has the ability to work with the Tuya Smart application for mobile devices.

Tuya is an international home automation platform that connects thousands of products made by different manufacturers. The system can support all the most popular communication protocols such as Wi-Fi, Zigbee, Bluetooth.
