PTZ OUTDOOR IP CAMERA **RHEITA-100** Wi-Fi - 1080p THOMSON

The RHEITA-100 External Rotary Camera cooperating with the user-friendly Thomson At Home platform.

Very easy operation via mobile devices (Android / iOS), allows the users for comfortable and remote operation, and also management of the camera. The used Wi-Fi module allows for remote communication up to several dozen meters (the distance depends on obstacles between the antennas).

The combination of a motion detector, white light lamp and IR illuminator with a rotating camera with a human figure recognition function allows you to effectively recognize an intruder and track his movement, while maintaining a high level of immunity to false alarms. Additionally, the camera has been camouflaged in the form of an elegant facade lamp.

Attention! The camera works only with the mobile application (the camera does not work with recorders). Controlling the device and schedule settings is possible if the device has access to the Internet.
