

Code: TW-WT12

## FAN HEATER **TW-WT12**

The TW-WT12 fan heater is an indispensable device for every household. The built-in thermostat allows you to set the target room temperature. After reaching the temperature set with the thermostat, the heater will be disconnected, while the fan, operating at the previously set speed, will continue to ensure proper air circulation. In addition, thanks to the timer, the device will be automatically turned off after the set time (adjustable in the range of 1 ... 12 h), so you can be sure that the fan heater is not working unattended at night or in the absence of household members.

Heating element:	Ceramic heater
Radiator:	✓
Thermostat:	✓
Protections:	thermal protection
Heating capacity:	400 W
Number of fan coolers:	1 pcs
Operation modes:	<ul style="list-style-type: none"> <li>• Cool air</li> <li>• Warm air</li> </ul>
Power connector:	CEE 7/17
Power supply:	220 V ... 240 V AC
Main features:	<ul style="list-style-type: none"> <li>• 2-stage fan speed regulation</li> <li>• Digitally adjustable thermostat,</li> <li>• Digital timer</li> <li>• Rotary power plug</li> </ul>
Color:	Black
