

DATA SHEET

Code: ACAR-S8-DUAL POWER DISTRIBUTION UNIT ACAR-S8-DUAL

The surge suppressor reduces the risk of damage caused by surges in power lines to TV, radio, computer or other electronic equipment. The ACAR-S8-DUAL has the power switch with light indicator built-in, which inform about the power voltage in outlets. Fuses protect against any short-circuits and power surges. Power charge 10A.

The distribution unit is equipped with 3 outlets powered continuously and 5 outlets disconnected from the supply voltage by means of a switch. This solution allows you to avoid using more than one power distribution unit when there is a need to disconnect only some devices from the mains (e.g. TV or computer) while leaving power to others (e.g. router).

Rated voltage:	230 V AC / 50 Hz
Nominal load current:	10 A (total)
Nominal voltage of surge suppressor:	250 V / 50 Hz
Protection level of surge suppressor:	\leq 1.3 kV (L/N)
Number of outlets:	8 grounded outlets 10A/250V
Automatic delayed fuse:	✓
Nominal stroke current:	2 kA (L/N) - 8/20 µs
Maximum stroke current:	6.5 kA (L/N) - 8/20 μs
Response time:	< 25 ns
Switch:	two-way, with light indication
Length of the cable:	1.4 m
Housing:	Plastic - non-flammable
Weight:	0.52 kg
Dimensions:	445 x 54 x 55 mm
Guarantee:	2 years
