

Code: AXON-PRO-IP-24POE+

OVERVOLTAGE LIMITER **AXON-PRO-IP-24POE+**

The AXON-PRO-IP-24POE+ is multi-channel device of AXON company designed to overvoltage protection of Ethernet 10/100/1000 Mb/s network devices connected to it and powered remotely with PoE+ technology. The PoE+ technology allows to power the devices with increased power consumption, such as Speed Dome HD cameras.

The device protects all pairs of wires in 4-pair cable carrying away the discharge current to the ground. Metal casing guarantees more resistance to mechanical damages and ensures good shielding of the entire protective system. The AXON-PRO-IP-24POE+ is designed to mount inside RACK 19" cabinet as 1U module. Using the shielded RJ-45 sockets and STP cable you can ensure shield continuity. The condition of correct protection is connecting the AXON-PRO-IP-24POE+ device to the proper grounding or PE wire.
