

Code: RM-II-8

RESIN CAPSULE **RM-II-8** Fischer

The RM-II-8 resin capsule together with the threaded rod is the first ETA-approved (Option 1) composite anchor with a capsule for cracked concrete, which does not require hole cleaning. The resin anchor can be used to fix steel structures, machine elements and staircases inside and outside buildings. In addition, the product can be successfully used even in holes filled with water. Thanks to its properties, it is widely used in residential and industrial construction.
