LED LIGHTING CONTROLLER **LED-W-WC/RF2** 2.4 GHz, CCT 12 ... 24 V DC MiBOXER / Mi-Light

The LED-W-WC/RF2 lighting controller is designed to control the activation, brightness and color temperature of two-channel CCT (Correlated Color Temperature) white LED strips. The controller is controlled using a wireless remote control operating in the 2.4 GHz band (available separately).

The MiBOXER controllers allow you to divide the lighting into up to 4 zones and independently control the zones using the remote control. Thanks to the repeater function, if the distance $\leq 30\text{m}$ is kept between the controllers, it is possible to transmit the control signal to controllers that are beyond the direct range of the remote control.
