## SWING GATE OPERATOR GENIUS-GBAT-300/KIT - SET FOR A TWO-LEAF GATE

The GENIUS-GBAT-300/KIT operator is designed for swing gates with a single leaf length up to 3 m. Thanks to many technological facilities, the device is safe and comfortable to use.

The operator does not require the installation of locks (self-locking). In the event of, for example, a power failure, a simple gear unlocking mechanism located in the operator allows for manual operation of the gate.

The kit includes: 2 operators (actuators) - model G-Bat 300, Brain 592 controller, set of VEGA photocells (transmitter + receiver pair), 433 RC radio communication module, ECHO TX4 radio remote control, container box for the controller - model JA320 and necessary mounting accessories.
