

Code: FAZER-767-SUNCO

CIRCUIT TESTER **FAZER-767-SUNCO**

The FAZER-767-SUNCO unipolar electrical tester is intended for performing basic tests of 230V/400V electric installations, car installations and other electric installations. The device can also be used to check the operations of electrical devices.

AC voltage range:	max. 500 V
DC voltage range:	2.5 V ... 60 V
Wire continuity test:	max. 1 MΩ
Operating frequency:	50 Hz
Tip width:	3 mm
Arrowhead length:	32 mm
Operation modes:	• FAZA - Phase and zero detection in AC installations, • CONT - Wire continuity test, • VOLT - Identification of voltage and polarization in DC installations
Main features:	• 3 operating modes: FAZA, CONT, VOLT • Test for the presence of a short circuit, open circuit • Beep signal, • LED indication • Battery lifetime : 10 000 single measurements • Compliance with 73/23/EEC, 93/68/EEC, PN-EN 61010-10 standards
Power supply:	2 x Battery LR44 1.5 V (included)
Operation temp:	< 60 °C
Permissible relative humidity:	< 90 %
Weight:	0.024 kg
Dimensions:	152 x 17 x 25 mm

DATA SHEET

Manufacturer / Brand:	Sunco
Guarantee:	2 years
