## CAR HOLDER FOR MOBILE DEVICES **XB-G-PRO** + 15W INDUCTIVE CHARGER Xblitz

The XB-G-PRO car holder is designed to mount a smartphone or tablet on the dashboard, windshield, grille, etc. Thanks to the large arm spacing (as much as 180mm), the product is also suitable for larger devices.

The device is equipped with a fast 15W inductive charger, so there is no need to connect a charging cable to the phone.

**Attention!** The holder is equipped with an automatic clamping mechanism - it detects the appearance of the device between the arms and automatically clamps it. The device is released by pressing the button. The design of the mechanism makes it impossible to use the handle without power supply.

Method of mounting:	Sucker / Clip with support
Mobile device holder:	Clamping arms - Automatic clamping, Ball head
Distance from mounting surface:	140 ... 190 mm
Vertical tilt of the handle arm:	0 ° ... 255 °
Vertical tilt of the device:	-43 ° ... 43 °
Horizontal tilt of the device:	-43 ° ... 43 °
Rotation in the plane of the screen:	360 °
