

Code: SR-806/LTE

LTE COMMUNICATION MODULE **SR-806/LTE** PRONAL

The SR-806/LTE is an universal transmitter with built-in modem to transmit and receive the SMS signals. It can be used to send the information about the state of system devices connected to it and to remote control them. It is designed to send the information both to monitoring stations and directly to mobile phones. The default way of sending notifications is LTE, but if internet data transmission is unavailable, the module sends SMS notifications.

Due to its easy montage, programming and operation can be used to monitor and control the alarm, central heating, air conditioning, power grid systems in single family houses, factories, cars, yachts, etc.

Alarm inputs:	8 pcs
Alarm outputs:	4 pcs OC
Telephone numbers to reporting events:	36
Event codes sending messages type:	LTE, SMS
Main features:	<ul style="list-style-type: none"> • 2000 events buffer • Transmitter has implemented auto-diagnostics functions • Device has a possibility to send reports
Power supply:	<ul style="list-style-type: none"> • 12 ... 18 V AC / 1.5 A • Battery : 12 V / 7 Ah - Emergency Power Supply
Operation temp:	0 ... 50 °C
Weight:	0.114 kg
Dimensions:	132 x 90 x 29
Manufacturer / Brand:	PRONAL
Guarantee:	2 years
