

Code: ATLO-FR1-TUYA

FINGERBOT SMART SWITCH **ATLO-FR1-TUYA** Bluetooth BLE, Tuya Smart

The FingerBot ATLO-FR1-TUYA smart switch allows you to remotely control a physical switch or button using a small actuator. The device uses the Bluetooth BLE 4.2 interface to communicate with the application. The basic functionality of the device allows control via an application from a smartphone connected via Bluetooth. The device can also work with Wi-Fi gateways, the use of which allows you to control the switch via the Internet. In addition, the device is equipped with a touch button that triggers the actuator to operate. This solution allows you to keep the option of using a button or switch without using the application.

Beyond direct control, the device has the ability to program the on and off schedule and linking to different system events. It is possible to create action scenarios with other devices. Voice control allows you to control the device via voice commands from Amazon Alexa or the Google Assistant (Internet access required).

Tuya is an international home automation platform that connects thousands of products made by different manufacturers. The system can support all the most popular communication protocols such as Wi-Fi, Zigbee, Bluetooth.
