

Code: F690BV+ZEL/305

## COAXIAL CABLE **F690BV+ZEL/305**

The F690BV+ZEL/305 is modern 75  $\Omega$  impedance coaxial cable with very good electric and mechanical parameters. For convenience, cable is marking with length counter printed with 1 m distance step. High frequency signals transmission in poor environment conditions. **The cable is gel-fitted.**

| In section:                        | 305 m . Price for 1m when buying a whole roll                                                    |
|------------------------------------|--------------------------------------------------------------------------------------------------|
| Inner conductor:                   | Ø 1.1 mm Cu Wire                                                                                 |
| Dielectric:                        | Ø 4.9 mm Physical foam                                                                           |
| Shield:                            | Al foil + gel                                                                                    |
| Braid:                             | Al wire                                                                                          |
| Outer coating:                     | Ø 6.9 mm PVC                                                                                     |
