

Code: ATK-LOG/FME

## LOGARITHMIC ANTENNA **ATK-LOG/FME** GSM/DCS/UMTS/HSDPA

Logarithmic antenna has been designed to use in GSM/DCS/UMTS/HSDPA systems.

|                  |                                                                                                                       |
|------------------|-----------------------------------------------------------------------------------------------------------------------|
| Frequency range: | 800 ... 2170 MHz GSM/DCS/UMTS/HSDPA                                                                                   |
| Connector:       | FME Socket                                                                                                            |
| Gain :           | max. 9 dBi                                                                                                            |
| Impedance:       | 50 $\Omega$                                                                                                           |
| Polarization:    | Vertical                                                                                                              |
| Main features:   | <ul style="list-style-type: none"> <li>• Length of the cable : 5 m</li> <li>• Very easy and quick assembly</li> </ul> |
| Weight:          | 0.586 kg                                                                                                              |
| Dimensions:      | 671 mm                                                                                                                |
| Guarantee:       | 2 years                                                                                                               |
